Done

Safety Method Statements

A Safety Method Statement should have been prepared roof work or where access only onto/across the roof is required - do you have it. Manual handling assessment must also be carried out. MS Guidance Notes for Roofwork are provided to help you.

Fall Protection

Ensure the measures to prevent falls of persons and materials/equipment through rooflights (which should have already been assessed and agreed) are in place before work on the roof commences

Signage/Notices

Display fragile roof warning signs on approaches to fragile roof.

Access across Roof

Ensure crawling boards or ladders are securely fixed to prevent slipping by means of ridge hook placed over the ridge (not on ridge tiles or capping tiles)
